

Where reconstruction errors remain

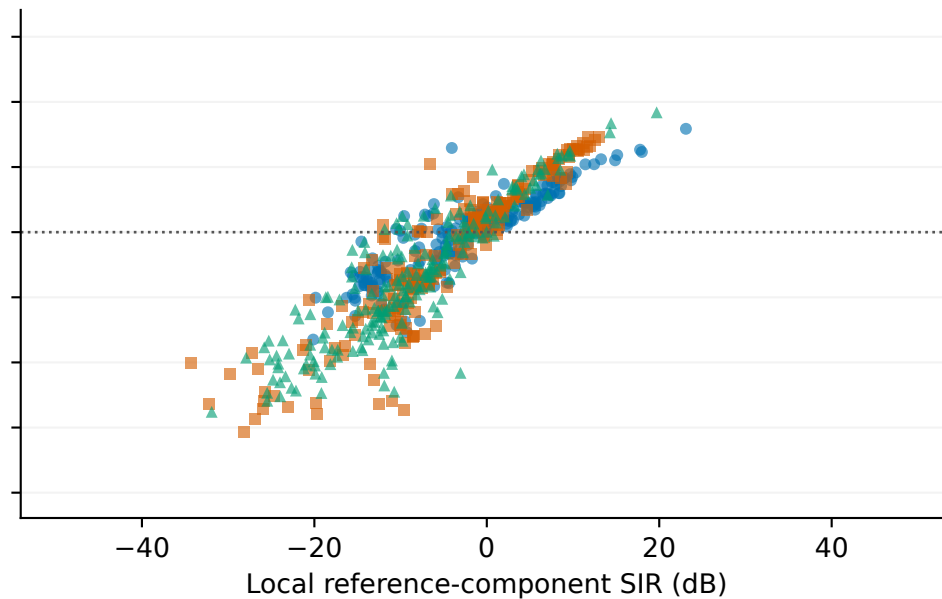

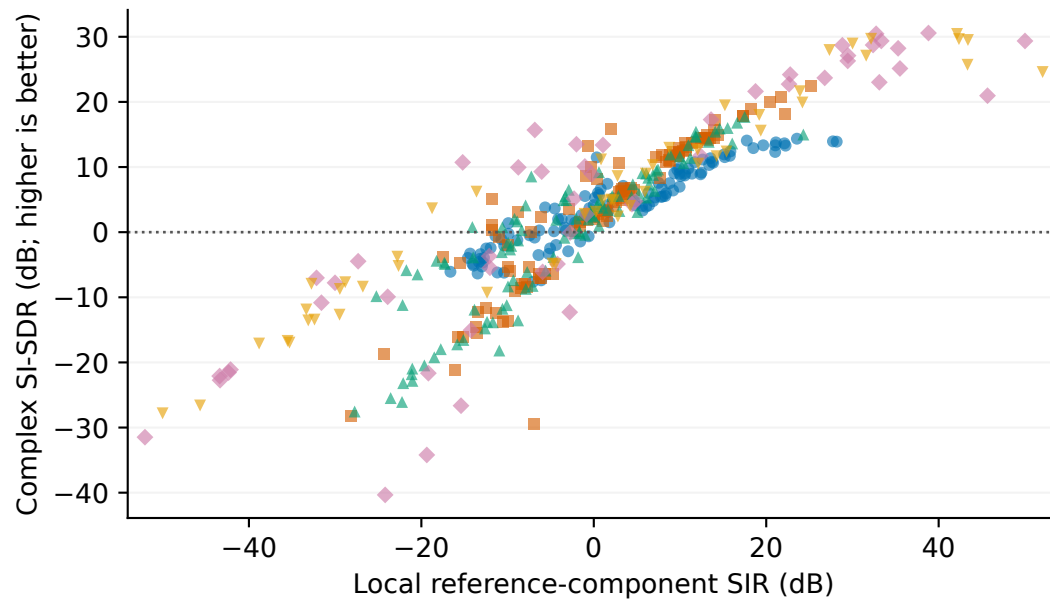

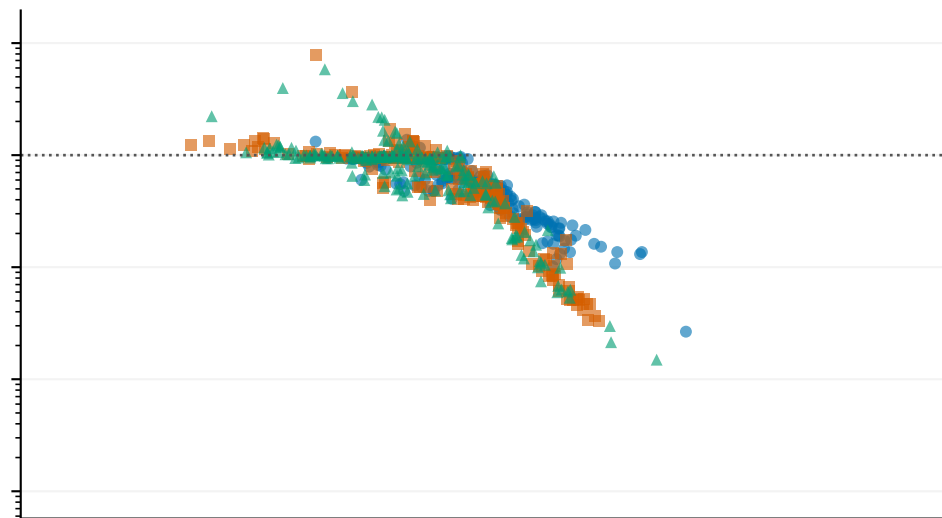

STFT U-Net | selected epoch 4 after 5 epochs / 375 updates | RFUAV development | seed 0

● Avata 2 ■ FPV ▲ Mavic 3 Pro ◆ Mini 3 ▼ Mini 4 Pro

2 recorded components | 210 mixtures

3 recorded components | 210 mixtures

All 1,050 component outcomes shown; no error-based exclusion or output gain correction.

SIR = reference power / sum of other reference powers. It excludes complex cross terms.

Dotted lines: NMSE = 1 (zero estimate); SI-SDR = 0 dB. Categories and recording conditions are confounded.

Correlated crops from 5 recording groups; descriptive development results, not independent test evidence.
